PROJECTS

Krishaka Kavacham – Python, TensorFlow, Flask, MongoDB

An End-To-End Genetic Trait Modification facility. The CNN-based model achieved **97.8% accuracy**, trained on **15,000+ images**. Research work on the same currently being published in **ICAISC** conference.

GST Predictive Analytics Engine – Python, ML Algorithms

Built a predictive model achieving **97.58% accuracy** and an **AUC-ROC score of 0.99**, effectively distinguishing between classes.

Utilized Stratified K-Fold Cross-Validation, improving generalization with an average accuracy of **98.20%**.

Applied techniques such as dropping unnecessary columns, removing selective rows, handling missing values using KNN (K-Nearest Neighbors), and resolving class imbalance through random sampling.

Ultra Fast Image Processor – C++, Multithreading, Image Processing, Operating Systems

Engineered a high-performance **image processing engine** with **5x faster execution** using **multithreaded grayscale conversion** on dynamically generated images up to **1024×1024 resolution**.

Achieved up to **80% CPU core utilization** by parallelizing pixel-level operations. Demonstrated scalability and responsiveness in **real-time scenarios** such as **satellite imaging**, **medical diagnostics**, and **security systems**. Designed with **Windows-specific threading APIs** and benchmarked on multi-core architectures.

Together Forever – Flask, MongoDB, JavaScript, Scikit-Learn, NoSQL, ESP32, Mediapipe, Twilio

Developed a comprehensive assistive system with **5+ integrated modules** for elderly care.

Features include **real-time Speech Emotion Recognition** to detect panic, stress, and confusion with **87%+ accuracy**; a **Medication Tracker** with **SMTP email**, **SMS**, and **voice alerts**; and a

Government Scheme Recommender tailored to user demographics.

Built an **IoT-enabled Fall Detection System** using **MPU6050 + ESP32**, and a **Posture and Neck Alignment Monitor** leveraging **Mediapipe Pose** for real-time skeletal tracking.

CERTIFICATIONS

Data Science for Engineers

A course on **R Programming**, **Statistics**, and **Linear Algebra**. Earned **Silver** certification with **Top 5%ile**.

NPTEL

March 2025

Supervised Learning Certificate (Certificate ID: M6H5Q2FGG22U)

A course that explores essential ML concepts such as regression, classification, and development of algorithms for neural networks.

April 2024

COMPETITIVE PROGRAMMING

LeetCode: <https://leetcode.com/u/i-want-a-job/>

Solved **200+ problems**; Rating: **1464**; Highest: **1492** (top 44% globally)

Codeforces: <https://codeforces.com/profile/Ani24>

Rating: **1002**; Highest: **1002**

SKILLS

Programming languages: Python, C++, Jupyter Notebook, Embedded C, Assembly, JavaScript

Python Libraries: Ollama, TensorFlow, PyTorch, OpenCV, Pandas, Streamlit

JavaScript Libraries: ReactJS, NextJS
